

**IILM UNIVERSITY,
GREATER NOIDA**

CISCO NETWORKING ACADEMY

TRAINING REPORT PRESENTATION

Networking Basics • Introduction to Cybersecurity
Introduction to IoT & Digital Transformation

B.Tech CSE • 5th Semester • 3CSE9

ANKUSH RAJ

Roll No. 2410031647
Batch 2024–2028
IILM University, Greater Noida, U.P.

COURSE COMPLETION DATES • JUNE 2026

Candidate Profile

Academic and training details

ANKUSH
RAJ

B.Tech – Computer Science
& Engineering

5th Semester • 3CSE9

2410031647

1

Institute

IILM University, Greater Noida, U.P.

2

Programme

B.Tech CSE • Batch 2024–2028

3

Training Platform

Cisco Networking Academy

4

Training Focus

Networking • Cybersecurity • IoT

Cisco Networking Academy

Three introductory courses that build one connected technology foundation

The three courses were completed as a single learning journey: first understanding how devices communicate, then how digital systems are protected, and finally how connected technologies transform the world.

1

Networking Basics

Foundation of networking, network devices, media, protocols, IP addressing and simple LAN concepts.

FOUNDATION

2

Introduction to Cybersecurity

Cyber trends, threats, safe behavior in cyberspace, privacy and protection of personal and company data.

PROTECTION

3

Introduction to IoT & Digital Transformation

IoT, connected devices, data analytics, artificial intelligence and digital transformation.

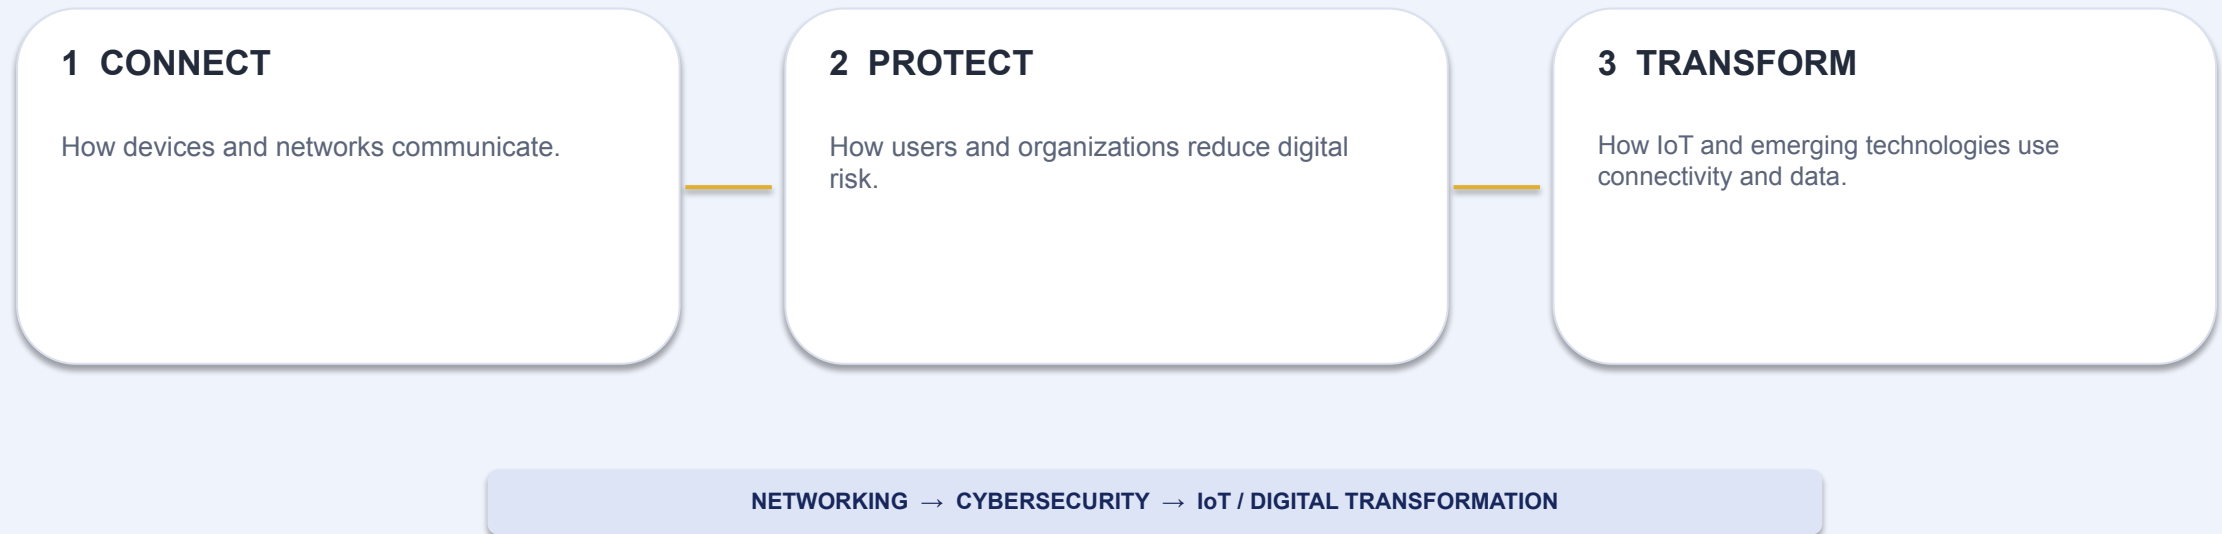

CONNECTED FUTURE

Building a Connected Technology Foundation

Why these three areas were studied together

Modern digital systems depend on networks, connected devices and information that must be protected. Learning these topics separately can make it harder to understand how the complete technology environment works.

The training addressed this gap through a simple progression:

What the Training Set Out to Achieve

Six practical learning goals

1

Understand Networking

Build a foundation in networks, devices, media, protocols and IP communication.

2

Build Security Awareness

Recognize cyber threats, safe online behavior and the importance of protecting data.

3

Explore IoT

Understand connected devices and the basic role of IoT in digital systems.

4

Understand Digital Transformation

See how data and emerging technologies change organizations and industries.

5

Connect the Domains

Relate networking, cybersecurity and IoT instead of treating them as isolated topics.

6

Prepare for Further Learning

Use the foundation for deeper study in networking, cloud, cybersecurity and software.

The Toolkit Behind the Training

Core concepts covered across the three courses

1

Network Devices

Routers, switches, hosts and the role of network media.

2

Protocols & IP

How protocols and IP addresses enable communication.

3

LAN Concepts

Basic network setup and communication within a local network.

4

Cyber Threats

Awareness of threats and risks in connected environments.

5

Privacy & Data

Protecting personal information and organizational data.

6

Internet of Things

Connected devices, data exchange and smart environments.

7

Data Analytics

The role of data in digital transformation.

8

Artificial Intelligence

An emerging technology highlighted in the IoT course.

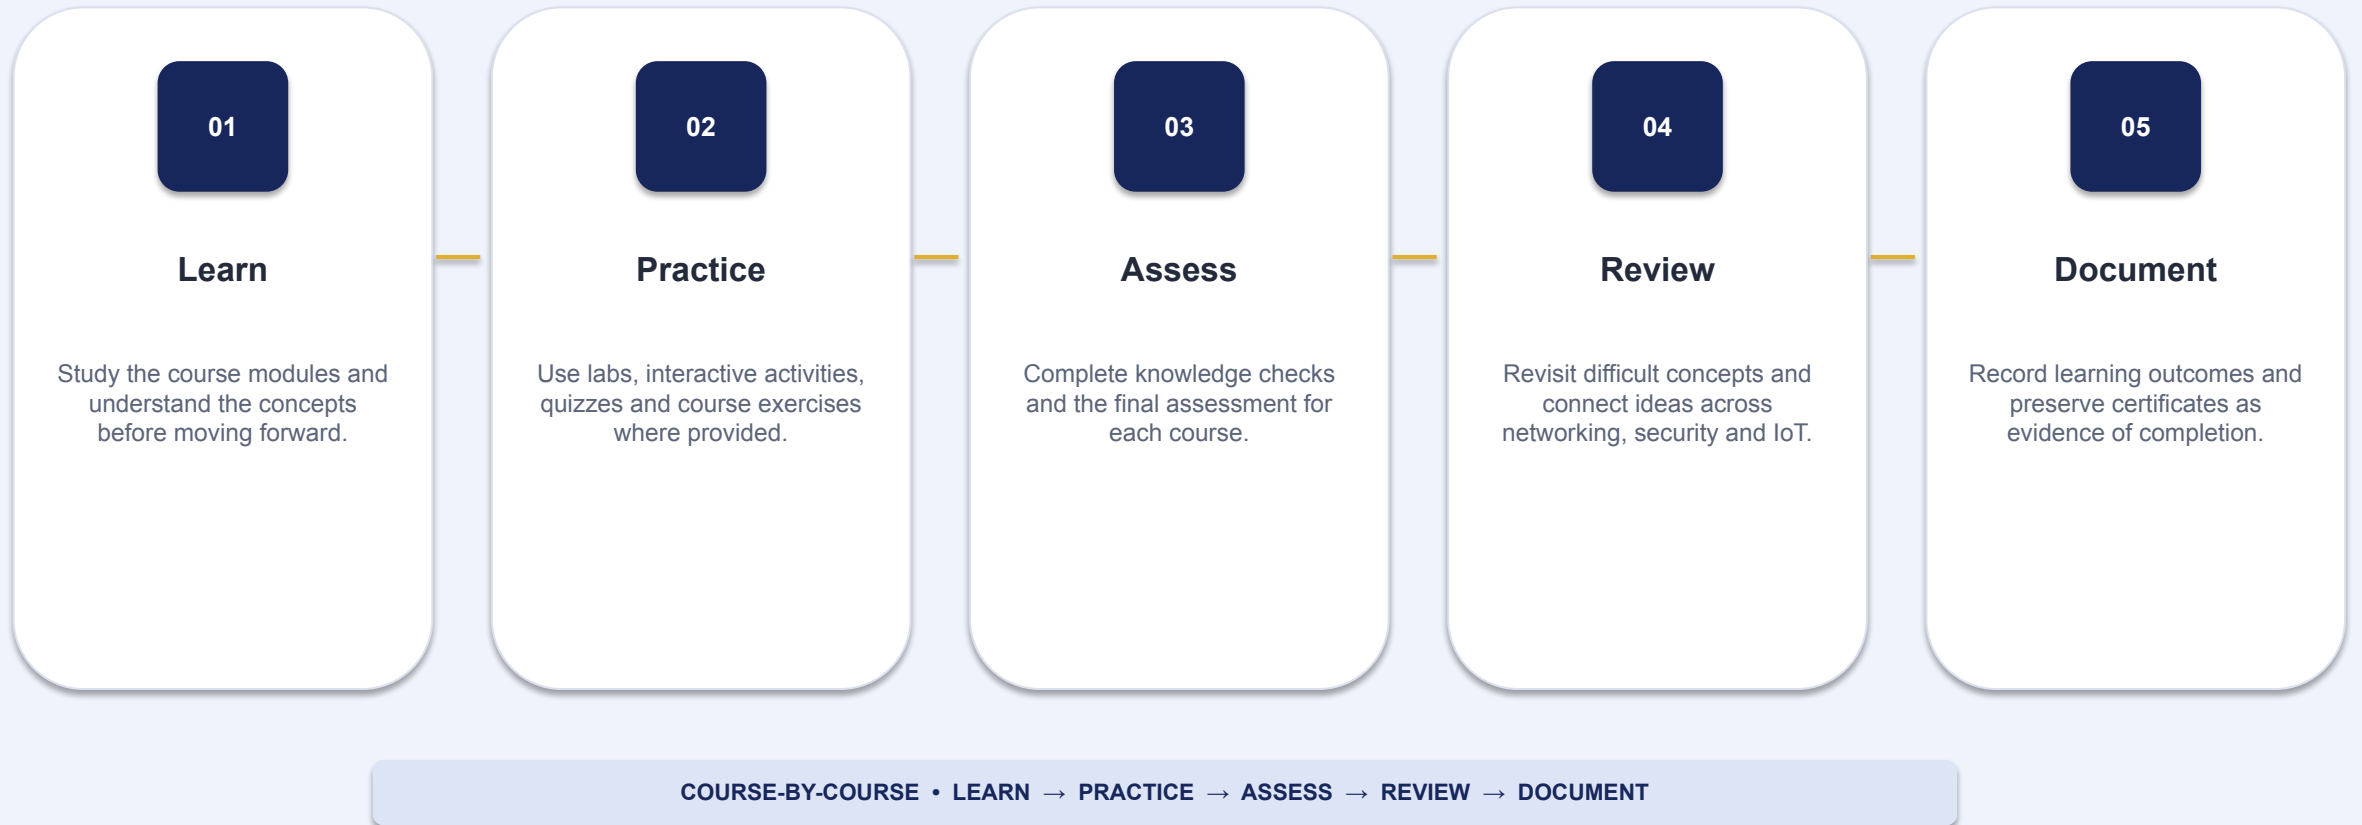

From Course Content to Demonstrable Learning

A simple view of how the training translated into outcomes

The Learning Process

A repeatable approach used across all three courses

Skills & Capabilities Gained

What I can take forward from the training

THE BIG TAKEAWAY

Connect the network.
Understand the risk.
See the connected future.

FOUNDATION BUILT

1

Outcome 1

Explain foundational networking concepts and terminology.

2

Outcome 2

Recognize the role of devices, media, protocols and IP addressing.

3

Outcome 3

Identify common cybersecurity concerns and safer digital practices.

4

Outcome 4

Explain why personal and organizational data must be protected.

5

Outcome 5

Describe the basic purpose of IoT and connected devices.

6

Outcome 6

Relate IoT to data analytics, AI and digital transformation.

7

Outcome 7

Connect networking and cybersecurity ideas to connected environments.

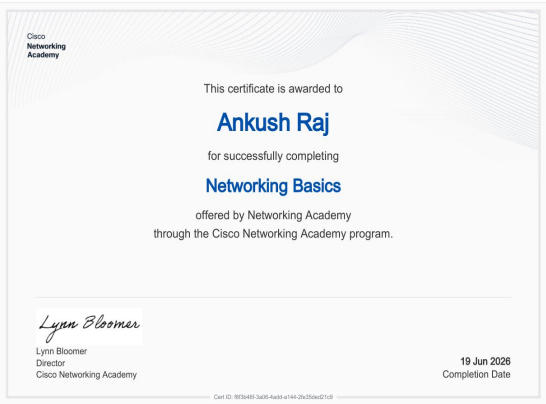

8

Outcome 8

Identify useful next steps for deeper technical learning.

Successfully Completed

Three Cisco Networking Academy course-completion certificates

Networking Basics

Completed: 19 June 2026

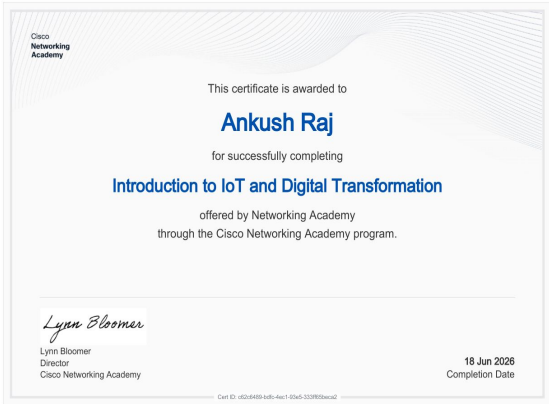

Certificate ID
f8f3b46f-3a06-4add-a144-2fe35ded21c9

Introduction to Cybersecurity

Completed: 18 June 2026

Certificate ID
ba50ba94-b82e-46ac-a506-fe2596b127fb

Introduction to IoT & Digital Transformation

Completed: 18 June 2026

Certificate ID
c62c6489-bdfc-4ec1-93e5-333ff65beca2
